PERSONAL SUMMARY

I am a 4th-semester B.Sc. student who wants to work with building things for the web. I've spent my time learning the MERN stack and Next.js by building real projects like a functional Myntra clone and an AI messaging app. I don't know everything yet, but I am a fast learner and a hard worker. I'm looking for an internship where I can contribute to real projects, learn from a professional team, and grow from a student into a developer.

SKILLS

- **Frontend Tech:** HTML5, CSS3, JavaScript (ES6+), and Tailwind CSS.
- **Backend & DB:** Node.js, Express, MongoDB, and basic SQL concepts.
- **Communication**
- **Problem Solving**
- **Frameworks:** React.js and Next.js (Current focus on full-stack integration).
- **Tools:** Git/GitHub for version control and AI API integration.
- **Time Management**

WORK EXPERIENCE

01/2025 to Current **Independent Web Projects**
Self-Employed

Project: Mystery Message App (Next.js & TypeScript)

- Created a project to explore complexities of AI integration and secure user authentication.
- Acquired skills in database management and API response handling through practical experience.
- Focused on making the UI clean and responsive so it actually looks like a real product.

Project: Myntra Functional Clone (Vanilla JavaScript)

- Started this to move beyond just 'pretty designs' and actually understand how a shopping cart works behind the scenes.
- Wrote the logic for adding/removing items and calculating prices using pure JavaScript.
- Used this project to get comfortable with DOM manipulation and CSS layouts.

EDUCATION

Expected in 08/2028 **Bsc. Computer Science**
Surya Sen Mahavidyalaya
• GPA: 7.5 CGA/SGPA
